MEDICAL LASER SAFETY OFFICER TRAINING

Offered as “Hybrid” meeting of Live Seminars and Webinar simultaneously

Individuals may register for the Webinar for \$995, saving travel time and money. \$100 discount for payments received by 20 days in advance. 15% Discount for multiple registrations. All receive accredited Certificates of Laser Training. Dates are listed at https://lasertraining.org/Seminar_Dates.html.

Groups may “HOST” their own meeting for \$2500 by projecting this Webinar to their group with one login. This includes **Seven seats** that will receive accredited Certificates of Laser Training. Additional Add-on seats may be purchased for \$395 each. You may have an unlimited number of unpaid attendees viewing the program, but we provide accredited Certificates only for those registered and paid.

How does this work for Groups?

Once you register for the program you’ll receive your login information for the program. One login will be provided and you’ll project the meeting to your hosted group. You’ll need:

- a digital projector that incorporates audio either in that unit or external, and a screen.
- A reliable internet connection.

-You’ll receive the cell phone number of our webinar coordinator to call if there are issues that arise in the initial connection or meeting. He can’t help with technical issues from your end but can ensure you have clearance to enter the meeting.

-To ensure that attendees get their Certificates you will appoint a Course Coordinator who we’ll work with for meeting details, plus provide a sign in sheet to the Coordinator to have all attendees sign. They will monitor attendance to ensure they attend the entire meeting or note on the registration sheet any altered times so that Certificates may be changed accordingly.

-The schedule of talks is published along with break times and lunches. The Coordinator ensures that attendees are in place at the proper times. The course info and outline is at <https://lasertraining.org/Library/PME-SmalleyJoint2DayCoursev2.pdf>.

-Groups may charge their attendees any fee they like. If this is for a hospital or laser company for employees then you probably don’t want to charge individually. If you invite outsiders to attend while you host the meeting you can charge whatever you like up to the registration fee of \$995. Promote your own event.

-Manufacturers and Distributors may use it as an event to provide additional promotional materials. Training groups can offer it to make money on it themselves. Hospitals schedule groups to ensure that it actually gets done and everyone can discuss issues at the same time.

-There will be Q&A sessions and our webinar coordinator will moderate those. Any submitted questions that we don’t have time to answer during the course will all be addressed individually by email later.

- Course materials will be downloaded via an FTP link sent via email.

The Webinar registration page is at https://lasertraining.org/Webinar_Registration.php.

In the meantime you can talk to Gregory Absten to register, ask questions, or customize this to your group by cosponsoring the program and having your name appear on the Certificates in addition to Professional Medical Education Assn. Greg Cell Ph 305.849.0285. Email Absten@LaserTraining.org.
