

Aesthetic Medi-Spa Treatment Protocols & Administrative Procedures

These are dated as 2008 protocols so should not be used blindly without reviewing for needed updates, but the content is generally still relevant as of 2022 and can be used for guidance in developing your own protocols, in concert with manufacturer recommendations and guidelines. They are particularly helpful to those just entering the Aesthetic Medicine areas and establishing their own programs and treatment protocols. Please consider this a very useful resource rather than a stand-alone procedure manual to use "as is". The following pages table of contents summaries of the list of files/documents in the manual. A summary of those sections is:

1. Light Based Treatments
2. Botox Cosmetic
3. Anesthesia and Pain Management
4. Aesthetic Treatments
5. Client Documents
6. Provider Documents

These materials were given to our non-profit Professional Medical Education Assn, inc as a partial payment on unpaid training invoices to the Medi-Spa prior to them declaring bankruptcy and going out of business. We have accepted these materials as partial payment and consider them our own property for use as we deem appropriate, and make these available to registrants in some of our training. The files total in excess of 4gb and are provided on a memory stick which is shipped to you via Fedx, UPS, or DHL.

The price is \$550 for all of the documents.
